Dear Prof. Flegel,

In support of the *Manufuture Initiative*, I would like to inform you that we have established a *Greek Manufuture Network* of companies supporting the *Manufuture Platform*.

The number of companies included in this network is, for the time being, **46** covering a wide range of manufacturing activities.

The first event to establish this network was held in Athens on Jan 19th where the main points of the *Manufuture vision* and *Strategic Research Agenda* were presented and discussed.

Main points of the initial discussion were included in the consultation submitted by us a few days ago for the *Manufuture platform*. As a spokesman for this *Network*, I will be available to present in more detail some points of view of the *Greek Manufuture Network* in the next HLG meeting.

Best regards

George Chryssoulouris

Professor

PS: For your information I enclosed a list of companies participating in the *Greek Manufuture Network*
